

Flatcar Container Linux

A secure, minimal Linux for containers

KubeCon + CloudNativeCon North America 2026

Project Pavilion, kiosk P-8A ·Hall 5, Cosmic Canyon Zone

A secure, minimal Linux for containers

- **Purpose-built for containers:** no package manager, no config drift
- **Immutable filesystem:** eliminates entire classes of vulnerabilities
- **Atomic A/B updates:** reliable, always-current OS upgrades
- **Ignition provisioning:** declarative setup on first boot
- **Open and vendor-neutral:** stewarded by the CNCF

CLOUD NATIVE
COMPUTING FOUNDATION

FLATCAR CONTAINER LINUX

Designed for

01

Containers

Kubernetes or your runtime of choice

02

Infra automation

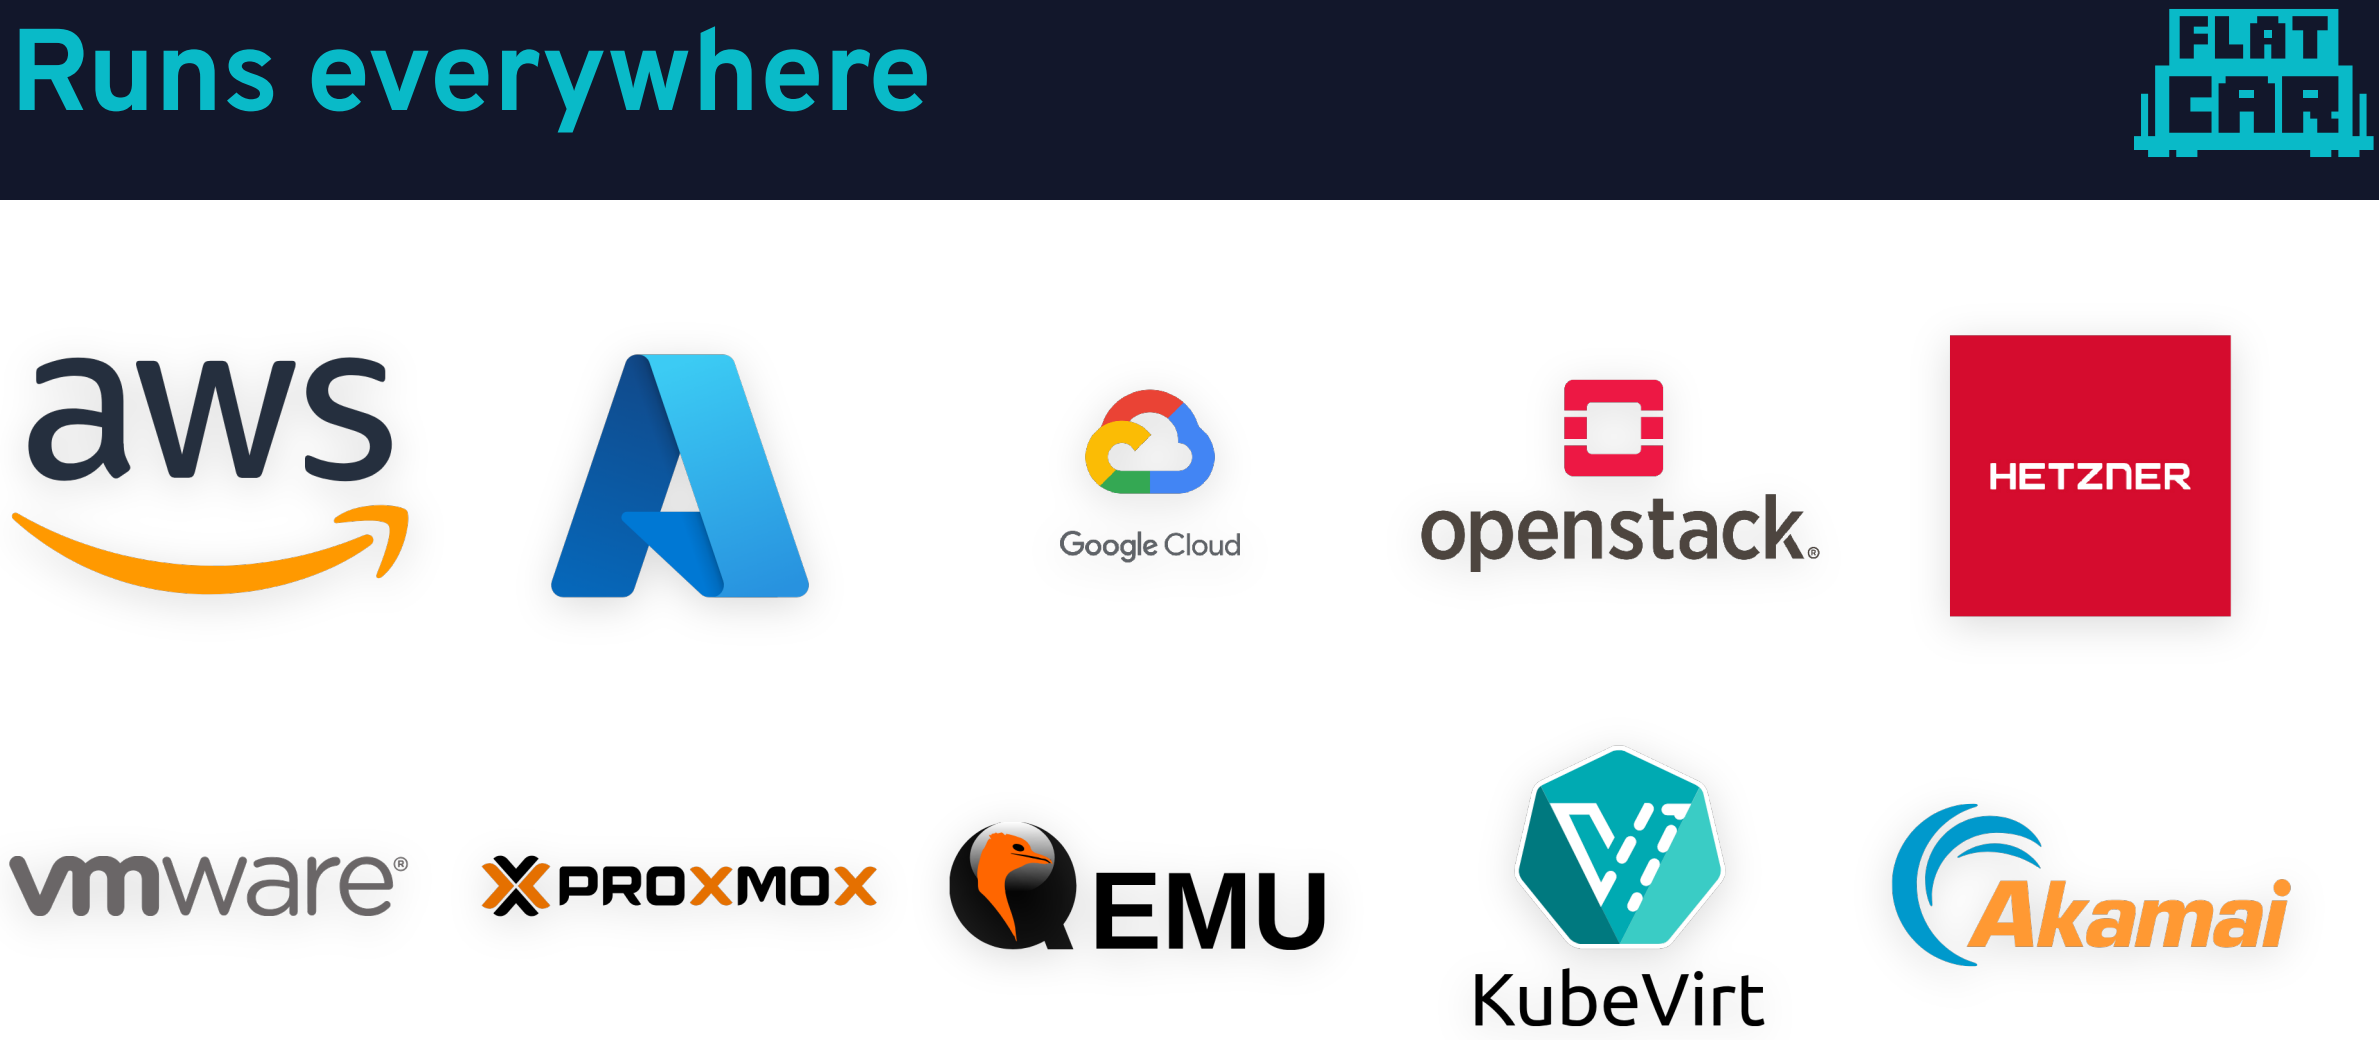

Declarative provisioning with Ignition

03

Security

Read-only, verified, automatically updated

Runs everywhere

Plus bare metal, and many more.
