

Flatcar Container Linux

A Secure, Minimal Linux for Containers

- **Purpose-built for containers:** No package manager, no config drift
- **Immutable filesystem:** Eliminates entire classes of vulnerabilities
- **Atomic, automated updates:** Always current with security and open source technology

Designed for

Containers

Kubernetes

Infra automation

with declarative provisioning

Security

FLATCAR CONTAINER LINUX

- **Immutable OS with A/B updates:** Reliable, atomic OS upgrades.
- **Ignition-based provisioning:** Declarative setup on first boot.
- **Open and Vendor-neutral:** Community driven and stewarded.
